FROM BROWSER BAR TO BOTTOM LINE

M4siz offers a revolutionary product query tool that simplifies navigation through your web site for your clients and customers.

Customers can find your products more quickly and make their purchasing decisions more easily.

Our patented technology allows customers to enter a plain text search query into the browser address bar after your corporate domain.

What's more, they won't get distracted by the competition on search engine listings!

Take this one step further and your customer can key in your advertising message to locate instantly what you have sold them in the market place.

Or they can get personalised information on your product in one click so why would they look any further.

NOT SO MUCH A CLIENT MORE A PARTNER

M4siz works with clients at a strategic level to ensure we deliver bottom line improvements for our clients. We spend time understanding our corporate partners' needs and how they use their web sites and intranets.

M4siz pulls together brand management, information technology and communication systems within our partners' organizations to deliver a consistent marketing message for your e-brand.

NAIL THAT MARKETING MESSAGE

When you purchase an M4siz product you are investing in one of the most cost effective and unique routes to provide a hook to your marketing message.

Your advertising campaigns and search engine marketing will be integrated into a seamless message across all media. This improves the marketing automation of your site and reduces the click through of visitors to those pages you want them to visit.

Your customers are happy because they find what they're looking for without trawling through endless searches. And M4siz gives you maximum opportunity to up-sell and cross-sell your products.
